

Webforum Teamwork

for Engineering and Construction

A new type of Construction and Engineering App

Webforum improves efficiency, cuts costs, speeds up hand over and improves team work

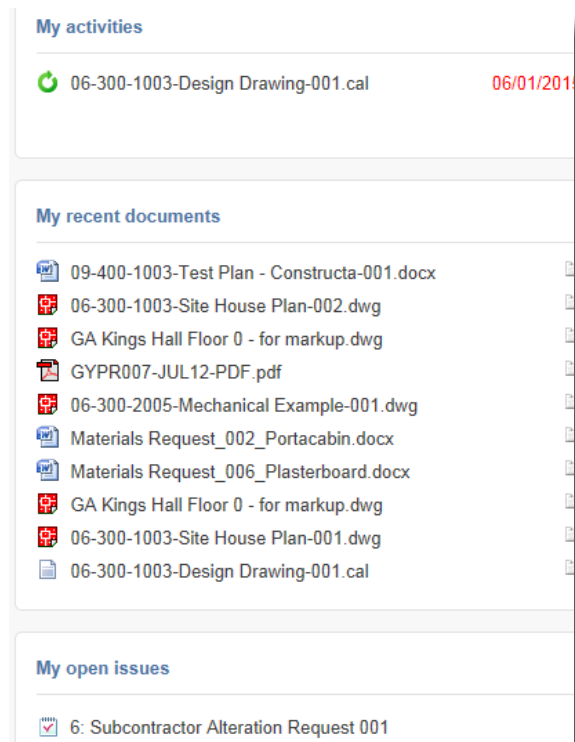

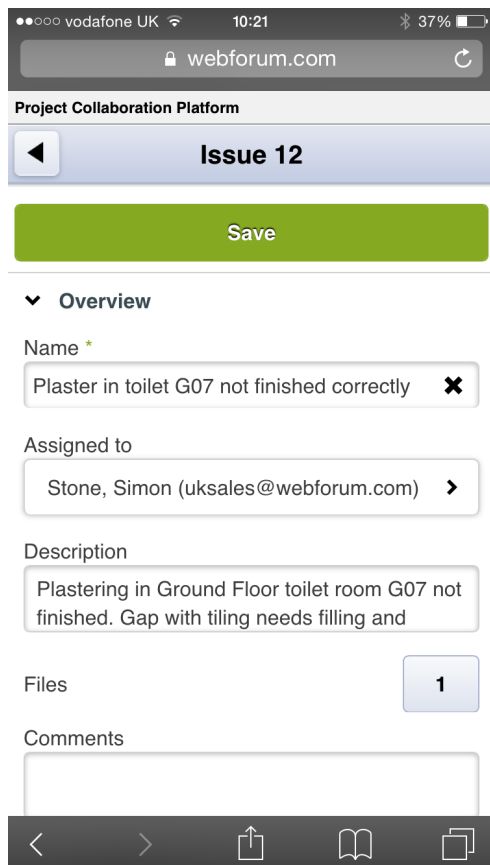

Webforum is a successful Swedish software now being introduced to the UK construction and engineering markets. It manages issues on desktop and mobile and improves project communication via a project specific website and social media type forums.

Collaborate on Issues from Anywhere

Manage tasks and issues from in-field as well as site office. Assign and track tasks to completion. Access information as well as capturing snags in-field. Works on any sort of mobile phone or tablet

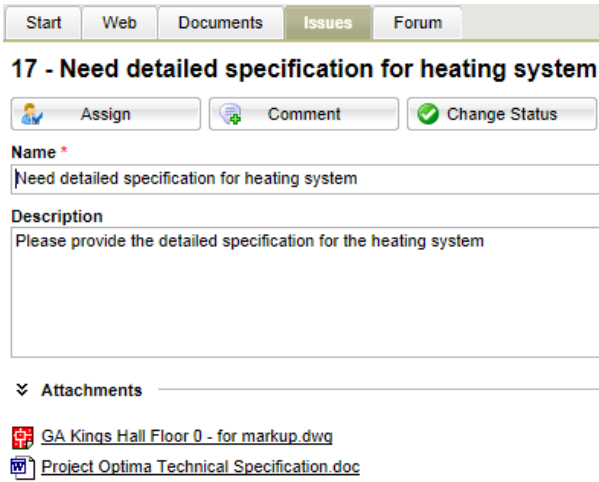

Use your personalized dashboard

View News, My Activities, My Recent Documents. A daily view of what you need to focus on. Highly flexible security roles.

Manage RFIs with secure audit trail

Set up your RFI template, link to drawings, ensure timely close out of RFIs. Secure audit trail of all RFI actions and timing.

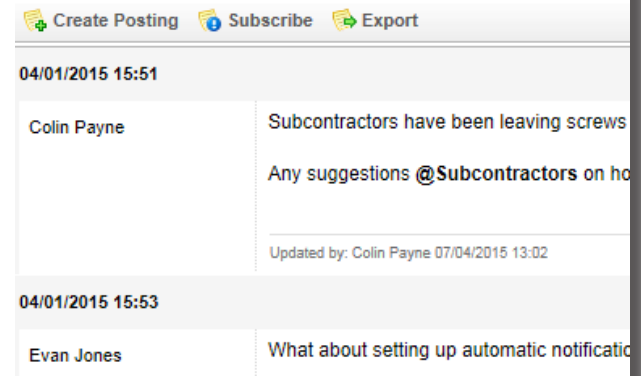

Find Solutions via Social Media Type Forums

Access the knowledge of your colleagues. Find Previous Solutions to your Problem. Stop "Re-Inventing the Wheel".

Screws in Dry Lining

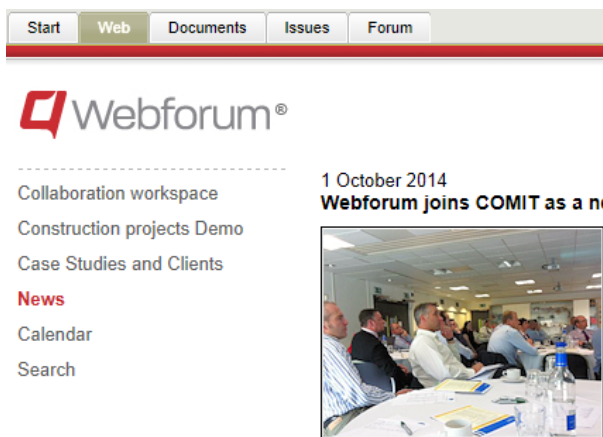

Kings Hall Site Suggestions / Screws in Dry Lining

You Own project website keeps the entire project team up to date

- Distributing project information by email is dated.
- Build your own branded site with:

- » News
- » Events
- » Safety information
